DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 are allowed.

With regards to claim 1:

- The best references found with regards to this application were:
 - Preslik et al. (US 4,836,568), Barnhardt et al. (US 5,593,167), Joubert (US 4,074,786), Hagarty et al. (US 4,779,692), and Peterson (US 3,903,981)

None of these references found individually or in combination anticipate the invention of the applicant. Specifically, the allowable subject matter present in claim 1 is the combination of the following: "a battery bracket attached to the battery carrier body at an end of the battery carrier body away from the vehicle body...the locking portion being engagable with a locked portion of said battery bracket when the battery cover is fitted to the battery carrier...". This has not been found to have been taught or disclosed in the prior art found at this time. Therefore claim 1, and those that depend therefrom (claims 2-4) are found to contain allowable subject matter.
